Application/Control Number: 10/707,909

Art Unit: 1765

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2, 9 to 11, 16 to 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable by Haldeman (5,461,215) in view of Ammon et al (6,117,230).

The Haldeman reference teaches an induction-heating coil in a crystal growth apparatus. The crystal growth apparatus has a means to receive a material for growth, which is to be heated. The heating means is an induction coil, note col. 1 lines 1-20. The induction means is a Litz coil, note col. 3 lines 2-55. The coils are cooled by water, which is allowed to flow through the Litz coil, note, and cite supra. The coils are in casings, which has two separate ends. The coils are insulted for each other note col. 4. The sole difference between the instant claims and the prior art is the housing means. However, the Ammon et al reference teaches a czochralski apparatus where there is a housing the surrounds the heating coils, note, figs. It would have been obvious to one of ordinary skill in the art to modify the Haldeman reference by the teachings of the Ammon et al reference to include a housing in order to prevent the heater from deforming and creating impurities in the process.

Claims 3, 5 to 8, 12 to 15 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haldeman in view of Ammon et al .

Application/Control Number: 10/707,909

Art Unit: 1765

The Haldeman and Ammon et al references are relied on for the same reasons as stated, supra, and differ from the instant claims in the construction of the coil.

However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to determine the optimum, operable means of construction, such as controllers, encasements, tie downs in the Haldeman reference in order to protect the coils during growth and secure the coils so that the coils do not cause vibrations during the growth which would ruin the crystals.

Claims 4 and 21-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haldeman in view of Ammon et al.

The Haldeman and Ammon references are relied on for the same reasons as stated, supra, and differ from the instant claims in the method of growth. However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to determine the optimum, operable means of growth which best use the Litz coils in the Haldeman reference in order to decrease energy use in the crystal growing methods. Further, the efficiency of the coils would inherently be similar as there is seen no difference between the Litz coils of the claims and the prior art.

Applicant's arguments with respect to claims 1 to 28 have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert M Kunemund whose telephone number is 571-272-1464. The examiner can normally be reached on 8 hours.

Art Unit: 1765

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on 571-272-1465. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
